Nelson Lumber & Supply Co.,
Grand Island,
Nebraska.

Gentlemen:

Don't forget us when you need some more narrow band saws. Those new, round gullet bands of ours, a sample of which is attached, would stand up exceptionally well to your work.

These new saws run true on the wheels, and stay sharp unusually long -- just the kind of saws factory men like to use.

30% is your discount from the list prices shown on the attached circular. This discount applies to the list prices on welding as well as the list prices per foot.

You can depend upon immediate shipment from our Chicago stock.

Very truly yours,

SIMONDS SAW AND STEEL CO.

V

The band saw files described in the circular are especially adapted for keeping the gullets round in band saws. The corners are well rounded besides being good and strong. We suggest you try them.
